Sunday school 10 a.m.  
Morning worship 11 a.m.  
Evening service 7.30 p.m.  
Midweek meeting:  
Wednesday 7.30 p.m.  
A cordial welcome awaits you.

## HEADS EDITORIAL COMMITTEE

Alexander Inglis, Ottawa correspondent of the London Times, has been appointed Chairman of the Editorial Committee of the Canadian General Council of the Boy Scouts Association. The appointment was made at the semi-annual meeting of the Executive Board of the Council when that body met in Montreal to bid farewell to Lord Rowallan, Chief Scout of the British Commonwealth and Empire, at the conclusion of his tour of Canada.

## THE LARDER

What just happens to be left over in the larder isn't quite good enough for your meals, from a nutritional point of view, at least. This is made clear by the department of national health and welfare, which has issued a reminder to housewives to stock up carefully, so that there will always be healthful foods on hand. The department invites applications for its free booklet, entitled, "Canada's Food Rules", of interest to all home-makers.

**SEALED IN by the Vita-Fresh Process to ensure roaster freshness. So when you buy Maxwell House Coffee in the Super-Vacuum Tin you get extra freshness and flavor.**

## M. C. ROBINSON PASSES AT COAST

Word has been received that Mr. Milton C. Robinson, for a number of years resident of the Lundbreck district, had recently passed away at the Pacific coast, where he had resided the past few years. No particulars were received.

## PIONEER TEACHER AND RIEL REBELLION VETERAN PASSES AT PINCHER

The death of a well known oldtime veteran of the Riel Rebellion and pioneer school teacher, Arthur Ed. Cox, 90, occurred at Pincher Creek Tuesday night.

The late Mr. Cox was born in London, England and in his early life was a sailor on the old sailing vessels of that day. He went to Australia and for a time was employed on a sheep station. He returned to England and later migrated to the United States settling first at New York city and in 1882 came to western Canada, first to Winnipeg and then farther west, being employed on the construction of the CPR.

He arrived at Pincher Creek about that time and from 1884-91 taught school here in the second public school, it is believed, in Alberta. In 1897 Mr. Cox was appointed Dominion lands agent at Pincher Creek and also represented C and E land interests. He also managed the old Hudson Bay store here. Mr. Cox received a farm west of town from government in recognition of his services in the Riel Rebellion in which he was wounded. He retired to the farm. Six years ago his wife passed away. He is survived by three sons and eight daughters, and a sister in England.

Mrs. A. M. Burnett, of Blairmore, and Mrs. Jas. Eddy, of Burnis, are daughters. Funeral will be held tomorrow afternoon from the United church in Pincher Creek at 2.30.

## "AMONG THOSE PRESENT"

The Pacific Islands At War  
Of all the defeats that Japan suffered in the World War, none was more complete morally and materially than that she sustained in the Pacific Islands. She started the war in one of them, Pearl Harbor in the north, and the long arm of her aggression was halted at Guadalcanal in the south. The official story of the Pacific Islands at war is now told in a booklet entitled "Among Those Present", prepared for the United Kingdom colonial office by the Central Office of Information in London published by His Majesty's Stationery Office. Although the notion that the Solomon Islands could be defended against Japanese attack was regarded as impossible, no suggestion of abandonment was ever raised. Responsible officials stayed and went underground and a game of hide and seek requiring ceaseless vigilance and courage played until re-occupation was possible. In this plan the natives played their full part, displaying a fanatical loyalty to the cause. The enemy invaded their country and they lived in his midst never doubting that the day would come when those men who survived would be driven out. They did not speak to him unless they had to; they never co-operated in any shape or form that would do harm to Britain's cause. They ran innumerable risks in conveying information to the Allied forces of enemy dispositions without thinking of the risks involved.

Our young people are still in danger from a killer more deadly than war—tuberculosis. Your purchase of Christmas Seals will help stamp it out.

## ELKS' MEMORIAL SERVICE TO BE HELD ON SUNDAY

The annual memorial service of Blairmore Lodge of Elks will be held Sunday next in the lodge room in the Oliva block starting at 3 p.m.

In addition to lodge ceremonies by the officers, the service will include solos and the memorial address by W. H. Chappell. Hymns to be sung will be "The Old Ragged Cross" and "Abide With Me." A. R. Bourne, as exalted ruler, will preside.

The service this year will be in memory of 29 members who have passed on since inception of the lodge in 1925. They are D. F. Fleming, H. J. Benson, L. Dutil, W. I. Huston, H. D. McMillan, C. H. Harrison, W. K. Hyslop, H. Instone, W. Howe, E. Hinds, J. E. Gillis, D. Dunlop, W. A. Bebe, C. Lien, F. Wright, M. Johnson, J. McMurchie, T. Smith, F. Gilroy, S. Ennis, H. O. Westrup, J. W. Makin, D. R. McKay, R. Marchant, S. J. Lamey, W. Harrison, F. Germain, W. J. Bartlett and J. McPhail.

## SCOUTS AGAIN REPAIRING TOYS

Across Canada Boy Scout Troops are busy in the annual Good Turn effort of the Association—The Scout Christmas Toy Repair Shop. In these shops the Scouts recondition used toys they have collected and distribute them to needy children in private homes and, in many instances, in children's institutions. Started in 1923 and carried on ever since, the Scout Toy Repair Shops bring joy to thousands of children every year.

## MORE WHISKY FOR ALBERTANS

Alberta's whisky allowance will be increased from two to three bottles a month, effective Dec. 1, J. A. King, chairman of Alberta Liquor Control Board, announced in Edmonton yesterday. The new offer allows purchasers to obtain a maximum of three bottles of whiskey a month, only one of which may be imported Scotch. This means that Canadian Scotch has been placed in the same category as Rye.

## THAT'S DIFFERENT

Vancouver, Nov. 27—Constable James Langton was amazed as he watched a man chase a woman across a downtown street from one house into another late Monday night.

"A man chasing a woman isn't news," he explained, "but this woman was completely nude."

Buy Christmas Seals.

Stout lady: I want to return this washing machine.  
Salesman: Why, what's wrong with it?

Stout lady: Every time I get into the thing, the paddles knock me off my feet.

## WEEKLY EDITORS PRESENT CAR TO RETIRING OFFICER

On his retirement as managing director of the Canadian Weekly Newspapers' Association after 11 years service, C. V. Charters, of Brampton, Ont., was presented with a new 1946 Pontiac sedan by

## King of Fruits — and a Queen

The 1946 apple crop in Canada is a bumper one totalling 163 1/2 million bushels, which is 20 per cent higher than the 10 year average 1935-44 and double the 1945 crop. Surplus apples to the needs of the Canadian market will be exported to Britain, the United States and other countries, either as fresh fruit or processed.

## PROMOTING WORLD FRIENDSHIP

More Canadian Scouts will be encouraged to work for the World Friendship Badge in an effort to increase Canada's contribution to world peace, it was decided at the Association's semi-annual Dominion Executive Board meeting in Montreal. The World Friendship proficiency badge requires Scouts to correspond with another Scout in distant countries for a certain period of time. Where possible, the Scouts are also encouraged to exchange visits.

## 600 YEARS OF SHIPBUILDING

To celebrate the 600th anniversary of shipbuilding in Sunderland in the north of England, an exhibition was opened there on November 16th. It will remain open until December 7th. During this period the Confederation of Shipbuilding and Engineering Unions will meet in Sunderland.

## SOCIAL AMENITY IS FINEST WAR MEMORIAL

One of the finest war memorials in Britain has been given to a Sussex county town by an unknown man. East Ginstead, at one time in the "Battle of Britain" country and with a high civilian death role for its size, is to have 120 acres of park land laid out as public recreation grounds. The Garden of Remembrance will be dedicated not only to the town's own war dead but to all who died for Britain. Among the woodlands will be a swimming pool and an open-air theatre, and in the park football grounds will be provided and a cricket pitch, as big as that at Lords in London, where county matches will be played.

## CHIEF SCOUT ENDS TOUR

Lord Rowallan, Chief Scout of the British Commonwealth and Empire, has returned by air to Great Britain after a successful nine week tour of Canada and Newfoundland. During his visit he saw Wolf Cubes and Brownies, Boy Scouts and Girl Guides in 85 Canadian centres and travelled more than 14,500 miles in doing so. He was accompanied on the tour by A. W. Hurl, London, General Secretary of the Boy Scouts Association, Imperial Headquarters, and W. L. Currier, Ottawa, Deputy Chief Commissioner of the Boy Scouts Association in Canada.

## GROWING PAINS

What parents sometimes accept too readily as mere "growing pains" in children may in fact, be symptoms of rheumatic disease. The Child and Maternal Hygiene division of the Department of national health and welfare, Ottawa, suggests that, if children exhibit a gas of pallor, nervousness and irritability, accompanied by static or falling weight, the family doctor be consulted immediately, as a safety precaution.

## "ONLY A KID"

A burglar bungled and was caught. "Why," exclaimed the cop who had him by the collar, "he's only a kid!" Only a kid but, in our growing crime wave, age group seventeen ranks first. Our country is becoming terrorized by its juvenile delinquents. Juvenile delinquency is due, it's often said, to delinquent parents. Not just father and mother who step out a bit themselves. But parents bling to the nature and need of children. Parents who neglect, spoil or dominate their children because they are "just kids". And children don't like to be overlooked, or kept in cotton wool or in a prison cell. So they escape, step out for themselves and get into trouble.

Effective in meeting this situation has been the work of Moral Re-Armament. Effective because it strikes at the root of the trouble. It starts with the home—gets parents to change and begin to treat their kids like grown-ups. To take their hands off. Then it gives the kids adult responsibility—a grown-up program. Not mere playgrounds or boys' clubs but a plan for their country. A plan to build sound homes—schools where they go because they want to, not because they have to—gangs which are cut to build up the town, not tear it apart.

Starting from scratch just a little while ago, hundreds of homes have already been saved from divorce. A new spirit has swept through scores of schools. A gang of former hoodlums have become assistants to the fire department. The school board and town council have united as never before in one major city.

## DOWN AT HEEL

You risk not only your social standing, but your very health, if you become "down at heel", declares the department of national health and welfare, Ottawa. An imperfect heel, spoiling poise and balance, as well as appearance, can make you unnecessarily tired at the end of the day, say the doctors, who urge consultation with the shoe-maker to correct that worn-down heel at the first sign that it needs repair.

## CHIEF SCOUT ENDS TOUR

Lord Rowallan, Chief Scout of the British Commonwealth and Empire, has returned by air to Great Britain after a successful nine week tour of Canada and Newfoundland. During his visit he saw Wolf Cubes and Brownies, Boy Scouts and Girl Guides in 85 Canadian centres and travelled more than 14,500 miles in doing so. He was accompanied on the tour by A. W. Hurl, London, General Secretary of the Boy Scouts Association, Imperial Headquarters, and W. L. Currier, Ottawa, Deputy Chief Commissioner of the Boy Scouts Association in Canada.

## Confidence In The U.N.O.

THE UNITED NATIONS' ORGANIZATION, which was formed when the nations concerned were firmly united in the task of winning the war, has since that time faced many difficult situations and successfully averted any acute crisis in international affairs. Because of the unavailing association in the minds of the public between the United Nations' Organization and the League of Nations, there have been many people who have, from the beginning, had little confidence that the U.N.O. would fare any better than did the earlier attempt to unite the whole world in the interests of permanent peace and security. These people could be reminded, however, that nations, as well as individuals, may learn from experience and that the U.N.O. will undoubtedly be a more solid structure, because of the knowledge gained from the workings of the League of Nations.

## The Need For More Patience

Mr. Sumner Welles, a former United States Under-Secretary of State, recently gave three lectures in Canada under the auspices of the J. W. Duffoe Foundation. The subject of these addresses, one of which was made in Winnipeg, was "The United Nations in the World of the Future," and in them Mr. Welles asked that people be patient in their attitude towards the U.N.O. He pointed out that although the organization is still in the early stages of its development, it has been able to avert international crisis during the extremely difficult period which followed directly after the war. If, he argued, it can accomplish this successfully, why should we not expect that it would preserve peace and restraint among nations even more successfully in the future?

## An Effort To Prevent War

The opinion of Mr. Welles and of many other outstanding students of international relations today is that there is need for realism in facing the existing problems, and for confidence in the future. The United Nations' Organization is one concrete effort on the part of people from many lands to find a solution to their difficulties and to avert future wars. Those who will not face the fact that there are grave problems which must be worked out, and others, who look upon the United Nations' Organization as merely an idealistic attempt at co-operation, are both working against their own interests and against our greatest hope for security in the future. "Had it not been for the existence of the United Nations during the post-war period," Mr. Welles said, "I am persuaded that there would be little, if any, hope today of saving humanity from world anarchy." If a statesman of Mr. Welles' experience and ability believes this, surely the U.N.O. does merit at least the reconsideration of those who now place little faith in its effectiveness. Confidence, and a realistic attitude on the part of everyone toward the major problems of the times, might go far in improving conditions now and in the future.

## NOSE-RUNNING HEAD COLDS DRIED UP QUICK

When a head cold gets your nose running "like a tap" and you have hot oil in feverish feeling you'll get almost instant relief with Buckley's Cinnamond Capsules. This different, effective prescription, which contains ONE but FOUR tested, proven, cold-dispelling, pain-relieving ingredients, dissolves all colds in Cinnamond which quickly checks nose-run-ning.

Get a tin of Buckley's Cinnamond Capsules today at any drug store. These Capsules are unequalled for prompt relief of headaches, neuralgia, periodic pains.

## EASILY EXPLAINED

An elderly woman named Martha was famous for her food, especially her apple pie. One evening a guest asked for the recipe. Martha was called.

Beaming, Martha told her secrets. Noting the beautiful scallions around the pie, the guest asked the culinary artist how she contrived to make them so even and symmetrical.

"That's easy," said Martha. "I just use my apple plate."

## ITCH CHECKED in a Jiffy - or Money Back

For quick relief from itching caused by eczema, skin-itch, hives, pimples and other itching ailments, use D. D. Prescription. Genuinely and scientifically developed. Itching stops. Soothe, cool and quickly soothe intense itching. Don't suffer. Ask your druggist for D. D. Prescription.

## RAW FURS

Vancouver prices this week show some changes. Average sold were—Badger \$4.10, Beaver \$28, Ermine \$2.10, Fisher \$45, Jack Rabbit \$35, Lynx \$35, Mink \$25, Muskrat \$12.50, Otter \$22, Raccoon \$25, Skunk \$15.00, Squirrel \$7.00, Wolf (coats) \$25.00, Fox (coats) \$25.00. For more money country dealers, fur ranchers and returns made by air mail or telegraph if desired.

## Price Control And Rationing Information

Q—How can I obtain the correct purchase price for fuelwood? A—Believe that our dealer is charging over the ceiling for fuelwood.

A—All types of fuelwood are still under price regulations and all licensed fuelwood dealers are in possession of up-to-date schedules listing ceiling prices on all varieties of wood and must keep these schedules posted prominently in their places of business. If you wish, you can check fuelwood prices by contacting the nearest office of the Wartime Prices and Trade Board.

Q—Are there still coupons in ration book 5 valid?

A—Sugar-preserves coupons in ration book 5 \$1 to \$25 are still valid. These coupons will be declared invalid on December 31, and coupon book five will then be of no further use.

Q—What dates do we obtain butter in the month of December?

A—Ration coupons for the purchase of butter in the month of December become valid on December 5, 12 and 19, the coupons being B34, B35 and B36 respectively. On December 31 butter ration coupons B29 to B34 will be declared invalid.

Q—What are the numbers of the meat coupons in ration book six that will expire on December 31?

A—Meat coupons M56 to M63 will expire on December 31.

Please send your questions or your request for the pamphlet "Consumers' News" or the Blue Book in which you keep track of your selling prices, mentioning the name of this paper to the nearest Wartime Prices and Trade Board office in your province.

## SMILE AWHILE

The colored preacher called all his flock together and before he started preaching he said:

"Brothers and sisters, you know Ah's been preaching to this congregation for about 7 years now, and every year on hog-killing time, all Ah gets is pigs feet and no pig feet. Now Ah'm going to tell you folks som'tin'; if Ah preaches to this congregation any longer, Ah simply has got to eat higher up on dat hog."

"Who's the swell man you was just talkin' to?" asked Tony, the bootblack.

"Aw, him and me's worked together for years," answered Mickey, the newsboy. "He's the editor of one of me papers."

Laborer—I dug this hole where I was told to, and began to put the dirt back like I was supposed to. But all the dirt won't go in. What'll I do?

The supervisor pondered, and then said: "I have it. There's only one thing to do. You'll have to dig the hole deeper."

Master of House: "Why did you tell my mistress what time I came home last night after I told you to be quiet about it?"

Maids: "I didn't, sir. She asked me what time it was, and I told her I was too busy getting breakfast to notice."

"I want some arsenic for my mother-in-law."

"Have you a doctor's prescription?"

"No—but here's a photograph of her."

Catty Friend—Are you sure your husband really goes hunting on those hunting trips he's always taking?

Woman—Oh, yes, absolutely. Catty Friend—But he so rarely brings any game home.

Woman—My dear, that's what makes me certain that he really goes.

His great love made the young man very eloquent.

"You are the most beautiful girl I have ever seen," he murmured. "I long to hold you in my arms to kiss your lips, your eyes, to whisper in your ear 'I love you!'"

But the businesslike young lady cut him short.

"Well," she suggested, "I suppose it can be arranged."

Teacher—Do we eat the flesh of the whale?

Scholar—Yes, ma'am.

Teacher—And what do we do with the bones?

Scholar—We leave them on the side of our plate, ma'am.

## INJURED IN PLANE CRASH—

Seventeen passengers and Stewardess Betty Dobson, 25, of Chicago, shown here, were injured in the crash of a United Airlines plane which killed the pilot and co-pilot at Cleveland airport.

## To Use Jet Planes

### Royal Air Force To Equip

### Fighter Squadrons

LONDON.—The day of the fighter plane powered by the gasoline reciprocating engine is gone and the R.A.F. will equip all its line and reserve fighter squadrons with jet aircraft as soon as they can be manufactured, an official source told the British United Press.

No more models of the famed Spitfire will be designed, according to the manufacturers. Its place in the forefront of the world's fighting will be taken by the Hawtand Vampire, Gloster Meteor, and their successors and competitors now being designed or built, air authorities said.

## HOW TO RELIEVE PILE TORTURE QUICKLY AND EASILY

If you are troubled with itching piles or rectal soreness, do not delay treatment and run the risk of letting this condition become chronic. Any itching or soreness or painful passage of stool is a warning sign. For this purpose, get a package of Hem-Rid from your druggist and use as directed. This formula, which is used successfully by millions of people, will quickly relieve itching and soreness and internally heal the piles. Hem-Rid is a powerful and chronic pile condition when such a fine remedy may be had at such a low price. If you try Hem-Rid and are not entirely satisfied, you may return your druggist will gladly return your money.

## WAR TERRORS MILD COMPARED TO DEER-HUNTING

BURLINGTON, Vt.—Armand Premo, 20-year-old war veteran, is convinced that the terrors of war are mild compared to deer-hunting.

Premo brought home a 250-pound, eight-point deer from the woods in Huntington.

But only after: He knocked it down with shot from a .22 calibre rifle, threw away his gun and mounted the deer, rode it back to his house, and then he killed it with a hunting knife before the buck dropped in its tracks.

The bullet wound was superficial. Premo grinned and said: "I guess I was a little excited."

## If Your Nose Fills Up—

Spoils Sleep Tonight  
Surprisingly fast, Va-tro-nol works right where trouble is to open up your clogged nose—relieve stuffy transient congestion. You'll like the way it brings relief. (NOTE: Va-tro-nol is also good for relieving stuffy, sneezy distress of head colds.) Follow directions in folder.

## Farm Wife Worth More Than City Girl

### Editor Of Farm Journal Gives Her Reasons

CHICAGO.—A farm wife is worth more to her husband than a glamorous city housewife, a woman editor said.

A farmer's wife is worth \$89,000 to her husband during her lifetime. A city wife is worth much, much less—how much less, the editor didn't say.

Gertrude Dieken, editor of the Farmer's Wife Section of Farm Journal, Philadelphia, made the estimate.

She said economists had arrived at \$89,000 from a 13-week study of farm wives and their work. Nobody has even bothered to compute a city housewife's value to her spouse, in monetary value is worth a lot less," Miss Dieken said.

"A farmer and his wife are in partnership," she said. "They are together most of the time and they work together all day long."

"But in the cities, wives never see their husbands from breakfast to dinner. They don't know what's going on at the office and they don't share in the business." The study showed that a typical dairy farm housewife washed 1,500 pounds of clothes, carried four and three-quarters tons of water and spent 57 hours in her laundry during a 13-week period.

## GEMS OF THOUGHT

### HIGHER JOYS

Joy is an elation of spirit—of a spirit which trusts in the goodness and truth of its own possessions—Seneca.

Who bathes in worldly joys, swims in a world of fears.—Phineas Fletcher.

Be faithful over home relations; they lead to higher joys: obey the Golden Rule for human life, and it will spare you much bitterness.—Mary Baker Eddy.

Tranquil pleasures last the longest; we are not fitted to bear long the burden of great joys.—Bovee.

Great joy, especially after a sudden change of circumstances, is apt to be short, and dwells rather in the heart than on the tongue.—Fielding.

The most profound joy has more of gravity than of gaiety in it.—Montaigne.

The use of postal cards was first suggested in 1855 by the director of the Royal Prussian Post.

there's just **ONE** word for it

"Believe me, bris means a lot when it comes to tea flavour. That's why I've switched to Lipton's Tea. Its bris flavour is so fresh, lively and full-bodied that pleasure multiplies with every cup. Give yourself the thrill of a tea with a flavour that's never flat or dull but always tangy and spirited. Switch to bris tasting Lipton's Tea today."

## Predicts Biggest Building Year In History For 1947

OTTAWA.—Canada is likely to have the biggest building year in its history in 1947, Reconstruction Minister Howe said in a speech prepared for delivery.

Mr. Howe devoted a major part of his address, broadcast over the trans-Canada network of the CBC in the political free time series, to a discussion of housing problems.

He said that although there now were 30 per cent. more workers in the construction industry than a year ago the 1946 target of 60,000 houses would be short by 5,000 to 10,000. Responsibility was pinned by the minister on strikes which interrupted the flow of materials.

"A survey of unfinished dwellings in municipalities of 5,000 population and over shows, as at Sept. 7, 35,000 units incomplete," he reported. Special efforts are being made to get priorities offered to bring into occupancy these houses which are 50 per cent. or more complete."

He voiced optimism on next year's outlook.

"I have every reason to believe that 1947 will be by far the biggest building year that Canada has ever experienced. Since war ended the best effort of the government has been directed toward accelerating the production of houses, just as the year 1946 was directed toward accelerating the production of munitions of war."

"Then, as now, there was widespread criticism of the government's failure to produce. I would remind you that after 1940 there was little criticism about the volume of production of munitions, and I predict that our efforts to accelerate the building of houses will meet with equal success. In saying this I am not minimizing the need for more houses. I am simply trying to emphasize that everything that I know of is being done to meet that need."

Touching on other post-war activities the minister reported that War Assets Ltd. is disposing of surplus war materials at the rate of \$20,000 a month with a total return to the Dominion so far of \$300,000,000. Renegotiation of war contracts had returned \$400,000,000.

## ANSWERS CRITICISM

Views Of British Commonwealth Not Neglected, Says Minister

CALGARY.—The Rt. Hon. Vincent Massey, former Canadian high commissioner to Great Britain, said in a speech with critics of the British Commonwealth when he addressed a joint Canadian club luncheon meeting here on "Canada's place in a troubled world."

Mr. Massey said the British nation has been often accused of forming a bloc or "grouping up" on other states. "Any experience I may have had in international gatherings would lead me to believe that the British Commonwealth should be peculiarly immune from such charge," Mr. Massey said.

He pointed out that British representatives often disagreed among themselves at international conferences. This fact should re-assure the most sensitive nations that there is little danger of a regimented point of view in the British Commonwealth.

"All through the colonial empire, self-government is being extended to-day," Mr. Massey stated. "That stubborn belief in freedom which carried the British through the war is not a commodity for domestic consumption alone—it is also an export. She (Britain) remains a beacon of freedom in a world where freedom is still at issue."

"Everyone in Canada was a beneficiary of battles fought by Britain for freedom, he said.

## CANADA'S SHARE

Liquidation Of German External Assets Will Give Dominion About \$15,750,000

OTTAWA.—Canada's share in the approximately \$450,000,000 worth of German external assets now being liquidated in neutral countries probably will total approximately \$15,750,000 government sources estimated.

This will be in addition to the Canadian share in Germany's internal assets. Of the internal assets, the Dominion expects to obtain 10,000 tons of German shipping and 1.5 per cent. of German's heavy industries.

A Washington dispatch estimated the liquidation of German assets in neutral countries probably would yield approximately \$450,000,000 for 48 Allied countries.

## SEEKS STATEHOOD

WASHINGTON.—The latest unofficial tally of the vote by which Alaskaans approved a resolution seeking statehood is 9,000 to 4,500. It was the heaviest voting in the history of Alaska, which has less than 45,000 inhabitants of voting age.

U.S. SOUTH POLAR EXPEDITION PLANNED—Rear-Admiral Richard E. Byrd (left), seasoned Antarctic explorer, shown with Vice-Admiral Sherman, will shortly direct a U.S. navy south polar expedition to collect weather test aircraft, ships and other naval equipment. Isolated Antarctic region was chosen to allay Russian worries over operations near Soviet territory and assure secrecy.

## Announces The Removal Of Wheat Quotas

OTTAWA.—Trade Minister MacKinnon announced the removal of all quotas on the amount of wheat which prairie farmers may deliver to their country elevators.

This means that farmers may deliver what they want to the elevators instead of being restricted to a certain number of bushels per acre, according to their district.

Officials said that up to now approximately 90 per cent. of the crop areas were on the maximum quota of 20 bushels an acre, or were entirely quota-free.

Mr. MacKinnon also announced that during the first 3½ months of the current crop year—up to Nov. 15—producers have marketed the exceptionally high total of 201,000,000 bushels of wheat. At Nov. 15, country elevators held 86,500,000 bushels.

"These deliveries and stocks are very gratifying in view of the export demand which now exists," he said, "but all wheat marketers by producers during the present crop year will be required to meet the urgent export demands for both wheat and flour."

Mr. MacKinnon said the Canadian wheat quota this fall resulted from the heavy shipments of wheat early this year which cleaned the elevators out at a distance from elevators have as much chance to deliver their wheat as those whose lands are close to the storage depots.

## BIRTH RATE DECLINE

Chief Justice McRae States Thirty-One Per Cent. Of Homes

TORONTO.—Decrease in the Canadian birthrate in the past 25 years is "an alarming truth," Chief Justice J. A. McRae of Ontario said at a meeting of the Toronto Centre Presbytery of the United churches. Thirty-one per cent. of all homes were childless and there was a tendency to ridicule large families.

President of the royal commission on Christian marriage and the Christian home, the chief justice presented the report of that body and said the Canadian family is fading away to tiny proportions with 4,318,188 persons 15 years old or under in an average of 1.7 children to each family.

Twenty-three per cent. of families in the Dominion had only one child while only 17 per cent. had more than three. The province of Saskatchewan had the greatest family average—3.9 children for each family. Quebec was next with 3.0 children, Ontario third with 2.5 and British Columbia fourth with 2.3.

## SETS NEW RECORD

British Jet Airliner Makes Fast Trip From London To Paris

PARIS.—The semi-jet-propelled British airliner, Nene Lancaster, hopped from London to Paris in 43 minutes establishing a new commercial speed record.

Later, the plane alighted down the Champs Elysees at rooftop height, with its two conventional gasoline engines shut off. The plane's two jet engines alone shot it through the air at a speed of 310 miles an hour.

The flight down the Champs Elysees was a demonstration arranged in connection with the Paris air show. The London-Paris hop was the first civil flight of a jet-propelled plane.

## TOURIST ATTRACTION

Jack Miner's Bird Sanctuary Proves To Be One Of The Greatest

WINDSOR, Ontario.—With the fall (November) migration of waterfowl at its peak at the world famous Jack Miner Bird Sanctuary twenty-five miles from here, the Customs officers and Immigration officers at this port of entry today said that "more people coming into Canada ask the way to Jack Miner than any other place."

All United States and Canada has copied his bird sanctuary idea for conservation of bird life which is a national asset to this country. Although the late Jack Miner passed on two years ago, it is good to know that his sons are carrying on the work more energetically than ever.

Before Jack Miner died he said "What made my bird sanctuary such a success was because I took God in partnership with me." He started to put verses of scripture on his bird bands and in this way he secured the cooperation of the Jesuit Priest and Anglican missionaries in Hudson and James Bay, who acted as his agents in collecting them from the Indians and Eskimos. The verses of scripture on the band gave him the whole-hearted co-operation of every church in North America. The banding of birds gave him the support of every sportsman, and thus the place has become so popular in attracting tourists from all over the world.

## POPULATION UP

Province Of British Columbia Passed The 1,000,000 Mark

VICTORIA.—Population of British Columbia has passed the 1,000,000 mark according to figures released by the ration administration of the prices board, making an increase of 145,474 in the last two years.

Ration book No. 6, issued in September, went to 1,019,745 men, women and children. Book No. 5, issued in October, 1944, went to 874,271 people.

Half the increase was in Vancouver city, where a total of 876,806 people were last year, compared with 508,468 in October, 1944.

## BOOKS FOR LIBRARY

MONTREAL.—Canadian Legion educational services announced it has handed over a first instalment of 700 volumes in good condition to the restored library of the University of Caen. The Legion hopes eventually to collect 100,000 volumes and \$100,000 cash for the university which was destroyed in the Canadian advance through Normandy.

## CHRISTMAS SEALS

BY E. L. ROSS, M.D.

Medical Director, Sanatorium Board of Manitoba

MOST people associate the colorful Christmas Seal with the campaign against tuberculosis but may not know, even though they buy them, the nature and extent of the remarkable work they make possible.

The money raised from the Christmas Seal sale last year paid for the x-raying of 100,000 people in Manitoba. Besides these x-ray surveys of whole communities and municipalities, Christmas Seals provide travelling clinics in thirty centres throughout the Province. They also provide rehabilitation service to patients in our sanatoria consisting of vocational guidance, training and assistance in finding employment.

Tuberculosis is an unnecessary disease for it is preventable and curable. The only means of radical cure is prevention which is based on the discovery of sources of infection at an early stage before germs can be spread to others. Treatment begun early results in almost 100% cure. In spite of this knowledge tuberculosis still causes more deaths between the ages of fifteen and forty-five than any other disease.

Tuberculosis in its real early stages does not cause cough, tiredness, loss of weight nor make people feel sick so to find those with the disease before it has reached the symptom stage, before they become sick and before the germ has been passed on to someone else in the family or community, people who are apparently well have to be x-rayed. The all-seeing eye of the x-ray is the only means of discovering tuberculosis at this early stage.

Within the last few years new x-ray equipment that takes pictures on miniature films has made it possible to do this.

## MAGIC EYE'S LUNG

With the new improved equipment, X-ray pictures of the lung require only a few seconds and can be taken with "clothes on." Group X-ray programs, to find unknown cases of tuberculosis, are still in its early and most easily curable stage, are sponsored by tuberculosis associations from Christmas Seal funds.

able financially to x-ray the whole population and it is the objective of the Sanatorium Board to complete the x-raying of everyone in the Province within the next two years. To

intensity this preventive service an all-complete mobile x-ray unit is needed and I therefore appeal to all citizens to support generously the sale of Christmas Seals being conducted under the auspices of the Sanatorium Board of Manitoba for the support of travelling clinics, mass x-ray surveys and the rehabilitation of tuberculous patients. Every case of tuberculosis discovered early prevents the infecting of an untold number of others.

Your buying of Christmas Seals is a practical way to decorate your Christmas mail and parcels and at the same time they carry a message of health and are a worthwhile investment in protecting your home from tuberculosis.

## Canadian Food Being Shipped To Alaska

OTTAWA.—Trade Minister MacKinnon announced that shipments of Canadian food already have started to move to Alaska, which appealed to Canada to help meet a shortage created by the United States marine strikes.

He announced that Canadian eggs, poultry, fresh fruit and vegetables have been sent to Alaska and added that arrangements were completed for the immediate shipment from Edmonton of 17½ tons of beef.

Mr. MacKinnon said negotiations were completed with the United States department of agriculture for the meat shipments and it was ascertained that 35 tons of beef would be required to satisfy the immediate demand.

"Of this amount," he added, "arrangement was made the same night for the shipment of 17½ tons from Edmonton, the remainder to go forward as soon as the importers have been designated by the Alaskan authorities."

The minister said the seriousness of Alaska's food situation was made known by telegraph to Canada by the delegate to congress from Alaska and the chambers of commerce in Fairbanks, Alaska, and Prince Rupert, B.C., early this month.

An immediate decision was reached to permit the export of eggs, poultry, fresh fruit and vegetables. "Normally," said Mr. MacKinnon, "only small shipments of foodstuffs are made from western Canada to this area, but in this case of emergency Canada was glad to be able to assist."

Since last June 1 when Canadian Army Occupation Force completed its withdrawal from northwest Germany, this section commanded and administered miscellaneous small Canadian units which remained behind to clean up the army's responsibility on the continent.

It had three main tasks: 1. The eight Canadian cemeteries in France, Belgium and the Netherlands had to be completed. This now has been done by No. 3 Cemetery Construction unit of the Royal Canadian Engineers.

2. A discipline unit and a section of provost were responsible for rounding up Canadian army deserters in northwest Europe and handing their courts-martial. Forty-four deserters have not been found. Some of them probably are dead or have found their way back to Canada, but the list is being turned over to the British army which will continue the hunt.

3. The section was responsible for operation of the Canadian wives bureau in the Netherlands, Belgium and France. The bureau has practically finished its work with 160 women and children left in Belgium and 100 to 200 in Holland. Their movement will be undertaken by the Canadian government's immigration branch.

Between 2,000 and 2,500 wives, children, dependents and fiancées have gone to Canada from the continent through the wives bureau this year.

## PROSPECTS GOOD

Trappers Expect Big Crop Of Muskrat Pelts In Spring

THE P.A.S. Man. Assn. expects crop of muskrats, possibly an all-time record number of pelts, is expected to be harvested next spring by trappers in northern Manitoba and Saskatchewan.

Estimates from the north country are that the trappers will exceed their 1946 income by more than \$2,500,000 as long as the market holds up at the present price of \$3 for prime pelts.

Trappers at scattered points throughout the north report that next spring will represent the top curve in the muskrat cycle, and that indications for an exceptionally heavy crop have never been so great.

Increases in the beaver population have also been reported.

## BOTH ARE SERGEANTS

OTTAWA.—Two R.C.M.P. corporals, J. J. Somers and his son, Larry, have received promotion to sergeant in the latest list of Mounted Police elevations. The father is in charge of the Ottawa town station, and the son is head of the Montreal narcotics squad. The promotion of father and son under such coincident circumstances is unparalleled.

## DISPUTE SETTLED

NEW YORK.—The Big Four foreign ministers broke their month-long deadlock on the future of Trieste and agreed on almost all the major issues which divided the western and eastern Allies on the problem.

## OVER MILLION MARK

VICTORIA.—Population of British Columbia has passed the 1,000,000 mark according to figures released by the ration administration of the prices board, making an increase of 145,474 in the last two years.

#### RUBBER CONTROL OFF

The United Kingdom Government's decision to restore private trade in rubber and allow the re-establishment

of London as the main world rubber market was taken after careful consultation with the trade. The secretary for Overseas Trade, Mr. Marquand, announced on November 4th that normal activities may be resumed on November 18th, and imports on private account may start on January 1st when the United Kingdom board of trade will cease to purchase rubber. This, Mr. Marquand said, follows the rapid improvement in natural supply over the past few months, particularly in Malaya. As a result the Combined Rubber Committee in Washington agreed that international allocation should cease after the end of the year.

#### VITAMIN C

Lack of Vitamin C in the diet affects the whole body, for, say health experts in the department of national health and welfare, Ottawa, this Vitamin is required to help body cells together, just as mortar is needed to keep the bricks of a house together. For proper intake of Vitamin C, nutrition authorities recommend vegetables, at this time of year, as the best and most inexpensive source.

Fight TB with Christmas Seals.

## Every Veteran

...should answer these questions:

"What is MOST important in my future?" SECURITY, perhaps you would say? You have won the right to plan your future! Plan it with life insurance . . . the strongest force to assure continuation of your present security . . . for yourself . . . for your loved ones . . . in the years ahead!

"Does it matter WHICH life insurance company I choose?" Yes! Life insurance companies are much alike as to policies and rates, but actual long-term results vary widely. We invite you to compare The Mutual Life of Canada's record with that of any other company.

Evidence of the satisfaction of our policyholders is furnished by the fact that whole families and succeeding generations have continued their life insurance programs exclusively to The Mutual Life of Canada, and each year approximately 35% of its new business comes from policyholders. Ask your Mutual Life representative to explain the special features of this Company.

## THE THINGS THAT MONEY CAN'T BUY

**HEALTH, A HAPPY HOME!** opportunity for your children; your own peace of mind—these are priceless gifts. You can't buy them with money.

But reasonable financial security, based on a planned programme of personal saving, can help to guard and guarantee them.

Take your Victory Bonds, for example. Pretty reassuring to have them tucked away as a financial reserve, always "on tap" in

time of opportunity or need. Pretty convincing proof, too, that you really *can* save when there's a real saving job to be done.

Perhaps today's rising costs or other factors are making it hard for you to carry on your savings programme. By the time you have met all your expenses, perhaps there's mighty little left for that all-important item marked "Savings".

Try putting savings first, not last, on

your budget list. *Owe yourself* a definite amount each month, and make sure you collect it. It means careful budgeting, and putting off buying a good many things you'd like to have. But never forget—this is your share of what you earn. This is the part of your income which will help to assure for yourself and your family all the things that money can't buy.

**PERHAPS YOU** are already one of the hundreds of thousands of thrifty Canadians who have a savings account with the Royal Bank. If not, we invite you to come in and open one. Perhaps your first deposit will have to be small; don't let that worry you. The important thing is to start. It will be a pleasure to serve you.

## THE ROYAL BANK OF CANADA

BLAIRMORE BRANCH - M. G. SMITH, Manager  
BELEVUE BRANCH - L. B. LONG, Manager

"You're starting just the way I did, Billy!"

Like Billy, Mr. Clark started in business delivering papers. He collected Fridays, settled with his publisher Saturdays and placed a portion of his profits in his savings account at the bank. That was 40 years ago. Mr. Clark has been using his bank regularly ever since.

Whether it was delivering papers, working week-ends at the corner store, or doing chores on the farm, you will always remember how proud you were of your first job, your first pay and your first bank book in your pocket. All were earned by your own initiative.

Today, as in the past, young people whose ambition is to get ahead, put their savings in the bank. It is the first step towards an association which can well be vital to business and personal life.

## Health LEAGUE OF CANADA presents TOPICS OF VITAL INTEREST

### BEWARE - - - OF RARE PORK

"And the swine is unclean to you. Of their flesh shall ye not eat and their carcass shall ye not touch." Such was the admonition given by Moses to the wandering Children of Israel more than 2,000 years ago. Moses undoubtedly had some good reason for formulating such a law, but it being altogether likely that he had noticed that serious illness sometimes followed the consumption of pork. Centuries later Mohammed forbade his followers the use of pork as a food.

Thus millions of people who today adhere strictly to the tenets of certain religious beliefs are spared the possibility of contracting a disease known as trichinosis. Trichinosis is a disease which 100 years ago was first recognized as one which resulted from eating pork which had become infested with a worm-like parasite—Trichinella Spiralis.

For those who do eat pork, it is imperative that they remember that raw or partially cooked pork is dangerous—that pork and pork products always should be well cooked.

In the year 1835, Sir James Paget, famous English surgeon, was doing a post-mortem when he noticed that numerous small lime and calcium-like swellings in the muscles were taking the edge off his knife. He took out some of these nodules and showed them to Robert Owen of the Royal College of Surgeons. Owen broke open some and examined them through a microscope. He found that inside each shell-like nodule, not as big as a grain of wheat, was a small, coiled up worm, hair-like in size and consistency. He named the worm "Trichina Spiralis" which really means "little hair of a spiral shape."

Today, the medical fraternity call this parasite "Trichinella Spiralis" which means practically the same thing. It is known that "Trichinella Spiralis" is a very small worm which is a parasite of the pig, and which, when eaten alive by a human being (as it may be when uncooked or partially cooked pork is eaten) becomes a parasite of the human being, and causes disagreeable and often fatal illness known as trichinosis.

The parasite is a small round worm. The pig is the animal most commonly infected, although rats and bears which eat infected pork may also become infected. The young worm, or larva, is very small and bores through the wall of the pig's bowel and gets into its muscles. In the muscles of the pig these small larvae surround themselves with a sac which after perhaps a year, becomes calcified and forms the hard small nodules which Sir James Paget noticed in 1835.

Pigs usually get infected in the first place by eating uncooked pig flesh—pork clippings in garbage. Care

### Build Home On Loot

Portland Couple Face Thirty Theft Charges

PORTLAND, Ore.—A three-room home built with stolen materials was listed today along with household furnishings and extensive wardrobes Sheriff Martin Pratt said were accumulated in a year by a young woman and her ex-husband charged here with 30 burglaries.

The sheriff said the \$10,000 in loot which four deputies spent a night and a day itemizing included a \$1,500 milk coat, two sets of silverware, a vacuum cleaner, radio, a portable sewing machine, a typewriter and several hundred household articles and clothing.

Sheriff Pratt reported William Franklin Leonard, 41, and his divorced wife, Christina Leonard, readily admitted the thefts after their arrest in the home they built a few months ago.

Most of the stolen building materials had been taken from housing project jobs on which Leonard worked daytime during the last year. Sheriff's Deputy Lyle Coking said the woman would drive a small truck at night to a home where her husband had broken in and together they would haul away the plunder.

Most of the articles were identified as coming from Portland's middle-class suburban homes where the sheriff's officers said a robber who left red candle drippings had operated for many months. Deputy Coking said candles were in abundance in the Leonards' new home and Sheriff Pratt earlier had reported Leonard admitting his trade was "safe cracking" benomoning leaving his former trade.

The couple married two years ago but divorced five months ago although they still worked together from the home, Sheriff Pratt reported. Sheriff Pratt said Leonard glumly blamed his error in robbing the home of a city detective—a former acquaintance—for his "change of luck" and arrest. The sheriff said Leonard's ex-wife told him Leonard almost killed himself in traffic trying to get to a bridge and throw away a fur neckpiece when he discovered it was taken from the home of City Detective Collie Stoops. The sheriff quoted Leonard as saying "I've had bad luck ever since."

### WORKED AS OFFICE BOY

George Bernard Shaw, renowned writer, worked as an office boy in the 1870s in a Dublin real estate office at a salary of \$4.50 a month, according to the Encyclopedia Britannica.

Never use DDT products near foods or drinking water.

therefore should be taken to see that pigs are not fed on untreated garbage, and that rats are kept away from piggeries, abattoirs and packing houses.

But since the pig, when he does get infected, has thousands of these larvae all through his body, it is impossible by means of any practical method of meat inspection, to safeguard the public absolutely. The public must safeguard itself, and the only way is to make sure that pork or pork products are well cooked before eating.

Remember, rare pork is dangerous!

## WORLD HAPPENINGS BRIEFLY TOLD

King's Cross railway station in London is to be rebuilt at a cost of \$5,000,000.

The White House, closed to the public since shortly before the war, has been reopened to visitors.

Canada will receive 10,000 tons of German shipwrecked vessels in all—as part of her reparations in the war against Germany.

A new iodine-containing tablet for purifying water in soldiers' canteens, considered superior to the chlorine type used during the war, has been developed in Boston.

Rev. Arthur Sewell, oldest member of Oxford University and oldest clergyman of the Church of England, recently celebrated his 105th birthday.

The Sunday Chronicle reported that technicians in the Soviet zone of Germany are developing a long-distance rocket which pin-points its target.

The late Hermann Goering's hunting chalet at Berchtesgaden, near Hitler's mountain eyrie, has been taken over by the Bavarian state, the Forestry Administration announced.

The southwest German city of Wesel, which was 95 per cent destroyed during the war, is to be rebuilt on the same site. Before the war Wesel was a city of 25,000 persons.

### FUSSY CROCODILE

TOWNSVILLE, Australia, A. 14-foot crocodile in a private zoo, in the northern Queensland State town is so fastidious it won't feed until owner St. John Robinson cleans its teeth with an ordinary toothbrush. Robinson, a master butcher, keeps the zoo, one of the largest private collections of animals in Australia, as a hobby.

The word panic is derived from Pan, the name of a mischievous pagan nature god who inspired terror in humans.

Chicken feathers have been made into an experimental yarn.

### Reward Was Small

Cabot Received Annual Pension Of \$100 For Discovering Newfoundland

When explorer John Cabot returned to Bristol in August of 1497 he informed Henry VII that he had discovered, naturally enough, a new-found-land. For his discovery of 42,734 square miles of abundance Mr. Cabot was paid \$50.

But this \$50 and a later annual pension of \$100 to "hymn that discovered ye new isle" was paid out of the coffers of the people of Bristol. Consequently Bristolites had a good deal to say, most of it bad, about this new-found-land. Thus the name Newfoundland came into general use.

Unless Newfoundland were pronounced as three separate words the line would not scan and a pronunciation adopted merely to fit the rhythm would make the whole thing ridiculous.

So today the formal pronunciation of Newfoundland calls for three "connected-separate" words with no special accent on any of them. However, in conversation Newfoundlanders have a tendency to slur the middle syllable and it comes out as NEWFUNLAND.

### DIAMONDS IN INDUSTRY

Diamond wheels are used to grind hard metals and alloys, plastics, fibres, ceramics and glass to very close tolerances; and to cut quartz, shape optical prisms and grind optical lenses.

## NEED NO BUTTER FOR FANCY BAKING

Successful Cooking Can Be Made Through Other Fats

The butter ration may be slim, and the grocer may say "no" when begged for shortening, but nevertheless careful housewives still are turning out successful pies and cakes. They're using every kind of fat they can get their hands on as replacement for butter and shortening quantities in recipes.

Experts of the Consumer Section, Dominion Department of Agriculture, Ottawa, say clarified pork fat or hard makes excellent pastry or cakes.

The flavor of fat from smoked pork blends well with meat, and therefore may be used to advantage for pastry for meat-pies or sausage rolls. It can also be used in any recipe for spice cookies or gingerbread which contains spices or molasses.

Any clarified fat or dripping may be substituted for shortening measures in all cooking except baking where large amounts of fat are used and a definite texture is desired.

Chicken fat with its bland flavor and soft texture can be used immediately upon being rendered for all types of cooking.

Beef dripping is too hard to use satisfactorily in cooking, but two cups rendered beef fat melted with one cup pork fat or lard and stirred occasionally while cooling to prevent separation gives a soft pliable fat.

Lamb fat is hard with a distinctive flavor. While not satisfactory for use in baked products, it goes well in the preparation of meat dishes. However, if after clarified lamb fat is mixed with a softer fat in the proportion of one part lamb to seven parts soft fat it can be used in baking.

Veal fat is soft and mild flavored, and when rendered is excellent for cooking. Different fats vary in shortening power. To substitute for shortening use: ½ cup clarified pork fat or lard; ¾ cup chicken fat; 1 cup beef dripping.

The zebra is a light brown animal with dark brown or black stripes—not a dark brown animal with light stripes.

## OUR COMPLETE SHORT STORY—

## THEN EVERYTHING STOPPED

By CAROL ELY HARPER

Copyright  
Wheeler Newspaper Syndicate

WELL, it came out all right—but I tell you, I had to stay awake the rest of the night to keep Nels from getting shot.

I started it. I don't know why, but I'm always starting things.

Chubby doesn't like it. Chubby's my husband. I call him that because he's chubby.

Like that time I went up to the hotel room with Bennie. Bennie is an old schoolmate of mine. I just went up to look at the window. Of course I didn't know Chubby was out on the sidewalk looking in and saw me step in the elevator with Bennie. If I'd known Chubby was there I'd have waited for him, of course. Chubby about brained him.

But when the burglar—and Chubby was gone—well, I don't think there was any excuse for Chubby getting so mad over that.

It was like this. We were on the wheat ranch that winter—Chubby thought maybe he could make it pay if he worked it himself—that was before he found out he couldn't and gave up and went back to town—to the hardware store—and the burglar had been breaking into ranches for miles around; robbing off and on the past six months. I was sure our turn was going to come next and I was terribly nervous.

I begged Chubby not to go to the city that night, but he got mad and sore. "Now look here," he said. "You know I've got to go in and get that tractor and drive it out early in the mornin'. And you can't go because you'd just be in the way! This is business!"

"But I'll be all alone!" I wept. "But you won't be all alone—" he was quite irritated. "Nels was our hired man. 'But he sleeps out in the bunkhouse!" I waited.

"That's near enough!" Chubby barked, not a bit sympathetic. "Now look, I'll leave you the rifle. You sleep with it. If you hear anything, shoot twice. Nels will hear and come on the jump, won't you, Nels?"

"Sure!" said Nels affably, looking up from the tail end of his supper. "Sure! I'll take care of her, Chub. You go on into town and don't worry! I'll take care of her!"

So Chub went. He took the automatic with him, in case he should meet with a road holdup. That burglar was sure terrorizing the country side mighty bad.

Well, when the dishes were washed and the chores done and Nels gone, I went upstairs and I got ready for bed. I put on my long white flannel nightgown. And then I took the rifle right under the sheet and cuddled it. And, believe me, my hand was shaky, but I kept it right on the trigger!

"Now come on, have some guts, Mary!" I told myself. "Cheer up, Mary, old girl!" I laid there in the dark, and I tried to shut out all thoughts except "have some guts." Right through my eyelids I could see the room was full of crawling shapes. I mean, it looked like it was full of crawling shapes. I was so scared.

Then something made a sound. I don't know what it was, but there was a althirring sound, just outside my window. I felt like an earthquake quakin', and my finger comes down on the trigger twice. The holes are still in the head board of our bed.

In two shakes of a lamb's tail Nels was there. He was wild eyed and dangerous looking in his night shirt. His gun in his hand, he recomended over the house. He came back.

"There ain't nobody in the house!" he said. "And there's 'n't nothin' outside. I looked good."

I was still shaking. "All right," I said. "But you're not goin' back to that bunkhouse! You sleep on the couch downstairs!" I went back to bed, with the rifle, again. Nels was sleepin' with his gun, in the dinin' room. His automatic went off awful easy. I remembered, with satisfaction.

All the doors were locked. And I had locked all the windows except the one in the living room that won't lock any more. That window is under my upstairs bedroom window.

It must have been about two hours later when I heard something gettin' in that livin' room window. There wasn't any doubt about it this time—somebody was crawlin' through that unlocked window!"

I was too genuinely scared this time to make a sound, I tried to scream to Nels but my voice was stuck in my throat. I laid there, vocally paralyzed, and shook. Then I heard Nels gettin' up off the couch in the dinin' room, that our upstairs staircase opens onto. I got up courage enough then to slip out of bed, with my rifle.

Somewhere I got out on the landing, I had some notion, I think, of helpin' Nels if the burglar took him from behind. Anyway, I was n't thinkin' of defendin' myself if the burglar brained Nels and tried to pull anything on me.

I listened. No lights showed downstairs. The burglar didn't even have a flashlight! Then I heard steps. The steps went, soft, stealthily, from the room to another. Then I heard other steps, followin' the first step! One man followin' another! It was terrible! I tried to get up my nerve—I just had to help Nels!

Down below the steps—steps went on—around the rooms—slinkly—one man stalkin' the other! All this time I was feelin' for the light switch on the landing, but my fingers were so stiff I couldn't find it. Then I found it. Standin' there in my flannel nightgown I switched on the downstairs lights.

Well, what I saw made me faint, so then everything stopped—or I don't know what might have happened! Chubby almost divorced me for it, but I finally got it explained.

No wonder I fainted! When the lights went on, there at the foot of the stairs stood Nels and Chubby—their pistols pointed at each other. "I thought so!" said Chubby, looking at Nels.

I don't understand why Chubby gets so jealous.

Well, what I saw made me faint, so then everything stopped—or I don't know what might have happened! Chubby almost divorced me for it, but I finally got it explained.

## DRUG MAY END HEART DISEASE

Penicillin Has Become Effective In Treating Endocarditis

NEW YORK.—Penicillin is effective in prevention and treating one of the most deadly heart diseases. Dr. Homer F. Swift, chairman of the American Council of Rheumatic Fever of the American Heart Association, said at the council's annual meeting.

The disease, he said, is known as sub-acute bacterial endocarditis, an infection that occurs in patients who have rheumatic heart disease. Before Penicillin, it was nearly always fatal.

At least half of the cases of this infection occur after a tooth extraction or an operation of the upper air passages, Dr. Swift said, and he urged national education for dentists and physicians, as well as the general public, in the new use for penicillin.

"If the patient receives penicillin prophylaxis prior to the extraction of a tooth, or any mouth or throat operation, the disease can be prevented," he said. "Where this is not done, and the disease develops, penicillin administered in large doses and over a long period of time can cure the majority of cases."

Bacterial endocarditis is a serious infection of the heart valves, he explained, and is caused by one of the streptococcus germs commonly known as "green strep," which is always present in the mouth and air passages. When a tooth is extracted, the bacteria enters the blood stream and grows on one of the heart valves previously damaged by rheumatic fever.

Dr. Swift said that the disease is a serious infection of the heart valves, he explained, and is caused by one of the streptococcus germs commonly known as "green strep," which is always present in the mouth and air passages. ## FARMER FINDS DEER BECAME TOO DEAR

STRAFFORDVILLE, Ont.—Deer!

Deer! Deer!

On his way to form a hunting party in this Elgin County village things ran ahead of schedule for farmer Archie Dennis. While Dennis was driving to pick up his friends a deer raced across the road and collided with his car causing damage estimated at \$60.

As compensation Farmer Dennis bundled the body of the animal into his auto and deposited it in a garage here while he went to notify police.

The law investigated but found no deer. The interior of the garage was wrecked and damage estimated at \$260. A broken window showed how the deer, who played possum, escaped.

Mr. Dennis said he was glad it wasn't a moose.

## Are Badly Needed

Many Canadians Have Discontinued

Sending Food Parcels To Britain

The Montreal Star says many wartime enthusiasts are prone to fade away as soon as the fighting ceases. One of those enthusiasts is that which led thousands of Canadians to send food parcels to Britons throughout the war. Now fewer parcels are being sent. And the pity of it is that the people of the British Isles need those food parcels more than they ever did before, because the disappearance of reserves has forced a tightening of rationing.

All the theories in the world bring home no bacon unless they are put into practice—and nothing illustrates the power of continued effort so well as the fact that a dime doubled 20 times is \$104,857.60.

## PARENTS TAKE NOTICE

Marine Sgt. Clarence F. Henschel,

22, Seattle, asserting his Christian name was an impediment to his career, petitioned the Superior Court to change his name to "Richard." "Rightly or wrongly," his petition stated, "there is attached to the name of Clarence a connotation of ridicule, and the name is usually used in connection with, at least, vacillating characters."

Send twenty cents (20c) in coins (stamps cannot be accepted) for this pattern. Write plain Size, Name, Address and Style Number and send orders to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg, Man.

## Some Short Names

Limit Of Brevity Is Not Confined To Only Two Letters

Miss Lu, Chinese author and journalist, who measures only two feet, has been described as the smallest person with the shortest name, at the Paris conference. In the latter respect, however, she is not without rivals elsewhere. A few years before the war a little Miss Ma was christened in St. Paul's Cathedral, while the United States has a family of some distinction named Elk, and Melbourne has a tradesman named Ny. Nor are such two-letter names the limit of brevity. First place in a recent New York telephone directory was held by Mr. A. and there used to be a popular restaurant keeper in Paris whose name was O.—Manchester Guardian.

HEALTH WEEK IN FEBRUARY  
National observance of Health Week in 1947 has been set for the week beginning Sunday, February 2, it is announced by the Health League of Canada which annually sponsors the event in co-operation with departments of health and education throughout the Dominion.

National Social Hygiene Day, a feature of the week's observance will fall on the Wednesday, February 5. This is an annual international event observed in both Canada and the United States.

## LITTLE DRAMAS OF HOME LIFE

All is quiet on the home front  
...then Mom hits the roof!

MOM was the one who could ride out the storms. Little things didn't annoy Mom. She lived for the day, and if everyone else was happy, so was she. Nothing jerky about Mom's nerves. They had regular habits.

So when Mom started to blow up every now and then, everyone wanted to get at the reason. The doctor found it. He said Mom—of all people!—had one bad habit. She was drinking too much tea and coffee—and when the stimulants of those beverages left her, she was cranky.

Your nerves aren't expendable! Drink Postum—for its grand, rewarding flavor—and because it's the perfect way to avoid drinking tea and coffee. Postum contains no caffeine to upset the nerves, heart or stomach. Convenient—made right in the cup—economical—costs less than a cent a serving.

A Product of General Foods

**"I'd like 11,506,651\* others to hear this"**

"No post mortems!" warned Ida, glancing at Ruth. "The game's over. Besides, your husband looks as though he has something on his mind."

"I sure have," said Bill. "Only I'd like the other 11,506,651 Canadians to hear this too. To-day I got hold of some figures that made me proud of the business I'm in. We Canadians now own more than 10 billion dollars worth of life insurance. And payments? During 1945 alone, the companies paid out about 66½ million dollars to widows, children and other beneficiaries. And another 95 million dollars was paid to living policyholders through matured endowments, dividends, disability claims, annuities and cash surrender values. That's what life insurance is doing for us Canadians."

"These life insurance benefits helped to pay off mortgages on homes, start youngsters off to college, settle older people into comfortable retirement. Countless families have thanked their stars for life insurance in time of need. Many, many others who are now building future security through their policies will be glad of it. But I want every living Canadian to realize the importance of Life Insurance."

Every life insurance dollar, while waiting to be paid out to its claimant, is working and growing in the service of the public, creating more jobs and more goods for more Canadians. Of that dollar about 57 cents is now invested in Government bonds, 5 cents is loaning for municipalities, 20 cents is building industries and public utilities from coast to coast, 8 cents is in farm and urban mortgages, another 5 cents is on loan to policyholders, 1½ cents is represented by real estate and 3½ cents is in cash and miscellaneous assets.

Life insurance not only grows in the scope of its protection, year after year, but is continually being employed for socially desirable purposes.

A message from the Life Insurance Companies in Canada and their agents.

\*Population of Canada, 1941 census, 11,506,651.

## Local and General Items

Mr. Lang entered hospital at Bellevue last Thursday.

Mrs. J. R. Warner is confined to bed and reported very ill.

Industry will either be the cradle or the grave of post-war democracy.

Miss Irene Danco has accepted a position on the F. M. Thompson Co. staff.

People we hate: Those who stage a joke and then forget how it is supposed to end.

A sound home is one that doesn't break within and cannot be cracked from without.

Mr. and Mrs. Ingram are leaving this week for Macleod where Mr. Ingram has been transferred.

Mrs. Wm. Morgan has returned home, following several weeks in a Calgary hospital, where she underwent an operation.

The local arena was opened last evening, with skating for juveniles at 5.30 followed by hockey practice and general skating.

There is no royal road to anything. Careful planning, hard work, determination to reach an objective—that's the path to success.

Sam says the best thing about a mink is that it gets the chance to hang round the neck of a beautiful woman after it is dead.

Mrs. J. Evans and children, of North Fork, spent the past two weeks in Blairmore, visiting Mrs. Evans' parents, Mr. and Mrs. Marshall Hamilton.

Rev. Grazier, rector of St. Luke's church, who has been a patient in Coleman Hospital the past few weeks, is reported greatly improved in health.

St. Anne's bazaar in Columbus hall on Wednesday was well patronized. The bazaar had to be postponed for a week owing to the heavy snowfall the early part of last week.

Louis Dorenzo, son of Mr. and Mrs. S. Dorenzo, arrived from overseas service over the weekend. His Holland bride has been here for several weeks awaiting his arrival.

St. Luke's annual bazaar will be held in the Oliva hall on Saturday of next week, Dec 7, from 3 to 6 p.m. Sale of fancy work and home cooking and tea served. You are cordially invited.

Major A. E. Larke, former pastor at Central United church, has been elected president of Magrath branch of the Canadian Legion. Rev. Larke served some time overseas as padre with the army.

Major James Allan, DSO, in company with his wife and daughter, Adrienne left Macleod on Tuesday or last week for San Diego, Calif., where Major Allan will take a three month's military course.

Mrs. Jean Marchant of 504 Sixth Ave. S., an employee of the Alberta Government Telephones, was taken to Galt hospital by the city ambulance Monday morning when she slipped and fell outside the Draffin Drug store, cutting her chin.—Lehrbridge Herald.

Mr. and Mrs. J. H. S. Moffitt and their baby daughter Jacqueline arrived Tuesday in Macleod after a year in New Zealand. Mrs. Moffitt is the former Miss Audrey Halliwell, and her husband served in the RNZAF and was an instructor in Alberta prior to going to Britain.

The heavy snowfall of a week ago, which always cause horses to wander around aimlessly in search of food and shelter, resulted in the loss of eight. Two were killed by trains in Bellevue, two in Frank, and three at Passburg, while one fell in the Amos cesspool at Bellevue and had to be shot.

If you buy, fewer will die—Buy and use Christmas Seals.

## Thank You

We wish to express our thanks to all who helped in any way on the night of November 20th, when fire blazed on main street in Bellevue. We wish to thank the town of Blairmore for the use of their fire brigade and the West Canadian Collieries in Blairmore for the use of their fire hose and reel.

Thanks also to the citizens of Bellevue who worked so hard to keep the fire under control.

We especially wish to thank the West Canadian Collieries fire brigade and the West Canadian Collieries for the use of their fire fighting equipment and to the men who assisted the fire fighters, and rendered invaluable assistance.

Our heartfelt thanks to all.

JOHNSON & COUSENS.

## TO WHOM IT MAY CONCERN

My wife, Rosie Terlecki, having left my bed and board, I will not be responsible for any debts incurred by her from this date, November 15, 1946.

(Signed) FRANK TERLECKI, Hillcrest, Alberta.
